

# CUSTOM FORGING SOLUTIONS

From the Largest OEM Supplier in North America

## THREE COMPANIES BECOME ONE WITH A UNITED MISSION:

**Optimize your process.**

**Maximize your uptime.**

**Reduce your costs.**

**Equipment, parts, service and support  
from a trusted, domestic source.**

Ajax/CECO/Erie Press is the union of three of the most respected and accomplished forging and forming companies in the world — Ajax, Chambersburg (CECO) and Erie Press. With more than 145 years of expertise, we can provide the customized, concept-to-implementation solutions you need to meet your forging objectives.

We design, engineer, build, rebuild and re-manufacture the world's hardest-working equipment. From aerospace, automotive, mining and construction to oil & gas, agriculture, transportation, industrial tools, commercial hardware and more, our machinery has helped form the backbone of the world we live in today.

- More than 16,000 machines built and installed worldwide
- 1,000+ global customers
- An unmatched archive of critical, historical data that can help power your operation into the future

## **A Comprehensive, Customized Supplier of All Things Forging**

Ajax/CECO/Erie Press is your comprehensive, single-source supplier of OEM equipment, parts, service and support. We're committed, reliable partners in problem resolution, with industry-leading engineering talent, decades of experience and far-reaching capabilities.

Our equipment is renowned worldwide for quality and durability: More than 40% of our machines built since 1875 remain productive today and include:

- Impacters
- Mechanical and hydraulic presses
- Forging machines and tube upsetters
- Forging rolls
- Wire & bar drawers
- Solid die forging machines
- Pneumatic and steam drop hammers
- Die forgers
- CECO stamps
- Wheel processing
- Carbon extrusion, compression molding & powder compacting machines
- SPF/hot forming and stretch forming machines

## **Building Customers For Life**

As North America's largest provider of precision-quality forging machinery, equipment and parts, Ajax/CECO/Erie Press brings the industry's most trusted and proven engineering expertise to bear on your forging challenges. Our goal is nothing less than to create customers for life — and we'll do everything in our power to make you one, too, with:

- Professional consultation and strategic assessment: a culture of people empowered to help you
- A dedication to understanding your unique situation, needs and objectives
- The ability to integrate everything we do with your existing equipment and optimize for your processes
- Expert, hands-on project management, installation and start-up
- The resources and expertise to maintain, rebuild and repair forging equipment
- A lifetime partnership for equipment, replacement parts and services
- A relationship-focused approach: we listen, continually add to our knowledge and skills, and strive to earn your business everyday

# How can we help you with the challenges facing your company today?

## What it means to have a long-term, domestic forging partner

Too many industrial manufacturers today turn to lowest-cost catalog suppliers for their critical forging and forming equipment. But many times these suppliers will ship you a product that's not customizable if your specs change and has a limited service life. Plus, these companies are often unable to respond rapidly with the parts and service you need to meet your customer demands.

### Unequaled Forging Expertise

There is no one more qualified to keep your equipment running than the people who built it. And Ajax/CECO/Erie Press has more than 145 years of forging and forming experience.

### A Commitment to Your Success

Whether you are forming, forging, hammering, stamping, pressing or extruding, the forging application engineers and technicians at Ajax/CECO/Erie Press can help you do it better. We understand the importance of uptime to your operation and are committed to helping you maximize it.

### Shared Know-How

Ajax/CECO/Erie Press provides equipment and training that is customized to your specific needs, and we help make sure your staff knows the ins and outs of running your equipment optimally.

### Original Quality Parts

Nothing beats the quality of genuine OEM parts. And that's what Ajax/CECO/Erie Press technicians use exclusively to keep your machinery running and your ROI churning.

### A Nearby Resource

No matter where your operation is located within North America, you're never out of reach of Ajax/CECO/Erie Press service and support. And with our augmented reality trouble-shooting technology and remote diagnostics, our tech experts can help diagnose and resolve issues without a site visit.
