

OEM PM Program

AJAX / CECO / ERIE PRESS

What is the PM Program?

Our OEM Preventative Maintenance Program provides recommendations for a spare parts stocking program. Reporting, accessible through an online portal, will document consistent & measurable production rates and preemptively detect potential critical failures and proactively scheduling service and replacement of parts.

What we do?

We aim to become an extension of your maintenance team through best practice and proactive training

Benefits

- Lower Operating Costs
- Increased Production
- Minimal Downtime
- Maximized Profits

Service

We can customize the PM Program to fit any budget providing as much or as little support as needed.

www.AjaxERIE.com

OEM PM Program

Program Outline

1

Preliminary review of existing PM Program documentation currently performed including lifecycle of frequently replaced parts

2

Documentation of all current, on-site machinery that we support for Parts, Service & Capital Replacement Proposals.

3

Our technicians will perform a health check on equipment and provide a detailed report including recommendations.

4

Determine your budget and cadence and we will schedule a Service Technician around your production calendar at regular intervals to perform critical PM tasks outlined in the agreement.

STOCKING PROGRAM

Select Long-Lead Parts can be added to a Stocking Program to prepare and plan for either scheduled routine maintenance or unexpected down time events.

Don't miss your chance to enroll in the industry leading exclusive, comprehensive Preventative Maintenance Program with your partner in manufacturing, Ajax/CECO/ERIE Press. Click the button below to sign up today.
